EXPERIENCE

JULY 2017 – PRESENT

SENIOR SOFTWARE ENGINEER, PAMPERED CHEF

I work as a senior software engineer for one of the engineering teams at Pampered Chef that is part of the RYBYOP initiative. The end goal for us is to make it easy for a consultant to easily run their business on a phone. While I work on full stack JavaScript, my focus within the team is in the front end. I am responsible for most of the front-end design decisions within the team, as well as consultant's corner in general even outside of our team. I also help/mentor other engineers when it comes to front end. I am currently working on a react/redux based pwa which will allow our consultants to browse our catalog while offline. This will enable us to sunset our mobile app, which is estimated to save us about 2 million dollars in the long run.

Tech: Git, Angular (8), React/Redux, service-workers, Indexed DB, node/express, typescript, Jasmine, Protractor, Cucumber, and related libraries.

AUGUST 2015 – JULY 2017

SENIOR UI DEVELOPER, RR DONNELLY

Responsible for building parts of and maintaining the RRD Care application using AngularJS, D3, Karma, Mocha, Chai, and Sinon. RRD Care was primarily targeted towards healthcare companies to help them with proofing and collaboration, and visibility to orders in production. I increased the code coverage to above 75%, advocated git best practices, implemented and maintained a living style guide.

Tech: AngularJS, Jasmine, Protractor, Gulp, Mocha, Chai, Sinon, Karma, ES6, Git

JANUARY 2014 – MAY 2015

UI DEVELOPER, FOLLETT SOFTWARE

Worked extensively with AngularJS in multiple projects, including implementation of eBook and Audiobook reader, admin panel and library home pages.

JULY 2012 – JANUARY 2014

UI PROGRAMMER, ALCHEMY COMMUNICATIONS INC

Responsible for website user interface development, Developed the presentation layer using HTML5 and CSS per internal standards and guidelines, including client-side validation and client-server communication using JSON over HTTP

EDUCATION

DECEMBER 2019

MASTER OF SCIENCE, COMPUTER SCIENCE, GEORGIA TECH

Graduated with a GPA of **4.0**

JUNE 2012

BACHELOR OF SCIENCE, COMPUTER SCIENCE, UC SAN DIEGO

SKILLS

- React, Redux, and related ecosystem
- JavaScript/ES6
- Html/Html5
- Jasmine/Chai
- Angular
- CSS/Sass
- Node/express
- Protractor/Cucumber
