WORK EXPERIENCE

Summary: Senior JavaScript/Typescript engineer. Expertise in front end development. Experienced with both React and Angular, as well as testing frameworks like mocha, jasmine, jest, react-testing-library, etc. Experienced in architecting, building, and testing components to ensure maintainable code. Experienced with deploying applications to cloud (AWS).

Backstop Solutions Inc

March 2023 – July 2024

Software Engineer

Remote

- Upgrade angular from v5 to v17 (in multiple phases).
- Refactor codebase to align with angular best practices and therefore more maintainable/debuggable.
- Advocate for and talk about front end best practices, including angular style guide and need for testing.
- Introduced functional unit tests into the project and built on them.
- Created low fidelity design using Miro, conducted internal UX testing, and then built the feature.
- Git, Gitlab, Angular, TypeScript, Bootstrap, and related libraries.

Stacklet

May 2021 – Nov 2022

Software Engineer II

Remote

- Build the front-end bits of Stacklet's user facing web app in React.
 - Developed and maintained a component library using story book for React.
 - Dashboards, Admin Panels, RBAC for admin panels, notification settings, etc
- Work in close collaboration with UX and backend engineers to ensure front end meets the user requirements and the API provides necessary data.
- Maintain a >90% unit test coverage using react testing library.
- React, Relay, react-testing-library, GraphQL, Git, related libraries.

Pampered Chef

July 2017 – May 2021

Senior Software Engineer

Addison, IL

- Architect and lead the development of Consultant Product Catalog, an offline capable React PWA that utilized redux for front end state management.
- Mentor engineers with different seniority on all things front end/Angular.
- Technical lead/point of contact for nearshore engineers.
- Drive the development, adoption, and maintenance of consultant's corner - an angular SPA that uses modular build and route based lazy loading.
- Ensure that code coverage sits around 80% for unit tests and help identify critical paths for e2e tests.
- Develop various server-side node/express apps to support client-side applications.
- Update critical user facing pages within Hybris to make them responsive/mobile friendly.
- AWS, Git, Hybris, Angular (8), React/Redux, service-workers, node/express, typescript, Jasmine, Jest, Protractor, Cucumber, and related libraries.

RR Donnelly

August 2015 – July 2017

Senior UI Developer

Warrenville, IL

- Responsible for building and maintaining the RRD Care application using AngularJS, D3, Karma, Mocha, etc.
- Developed and maintained reusable component library in close collaboration with UX, product and QA team
- Improved code coverage from ~30% to >75%

EDUCATION

Georgia Tech

December 2019

MS, Computer Science

- Graduated with 4.0/4.0 GPA., Graduate TA for CS-6400: Database Systems Concepts and Design.

CERTIFICATIONS & SKILLS

- **Certifications:** AWS Certified Solutions Architect – Associate.
- **Skills:** React ecosystem, Angular, JavaScript/TypeScript, CSS/Sass, Unit/E2E Testing, mentoring.
