hello@adevkota.me ❖ (818) 288-3344 ❖ Aubrey, TX ❖ <https://adevkota.me>

WORK EXPERIENCE

Summary: Senior JavaScript/Typescript engineer. Expertise in front end development with both Angular and React, as well as backend development in node. Experienced in architecting, building, and testing components to ensure maintainable code. Experience with onshore/offshore collaboration. Familiarity with AI powered development tools like copilot, Claude code, ChatGPT as well as AI concepts like Agent skills and MCP. Familiar with Java, python, etc.

American Airlines (via Heart Centrix)

November 2024 – Current

Software Developer

Fort Worth, TX

- Use AI powered tools (co-pilot, etc) within the IDE environment to help write and refactor codebase including automation tests, angular version updates (up to v21), etc.
- Used co-pilot chat to stand up an angular based micro front end remote app, and then utilized skill provided by a different team to integrate the MFE with an existing “shell” application.
- Upgraded angular from v8 to v19 for contact us pages, made necessary changes to ensure prod builds are optimized per angular specification, do ongoing maintenance work to keep version updated
- Migrated legacy forms to responsive angular pages.
- Wrote reusable, maintainable and testable components for intra-team usage, as well as coordinated with other teams to consume components maintained by them to ensure consistent UI behavior across AA.com pages.
- Introduced/integrate apollo GraphQL client into the front-end code as a part of migration to GraphQL APIs from rest APIs
- Updated Java based backend code to handle forms based on locale, and route them to appropriate inbox or queue.
- Manage traffic rerouting during deployment process using Akamai GTM dashboards
- Created Dynatrace dashboards and Mezmo logs to help monitor multiple app status.
- Debug and fix bugs using dev-tools like chrome debugger, angular devtools, etc.
- Git, Gitlab, Angular, TypeScript, Bootstrap, Java, Cypress, Jest, Mezmo, Dynatrace, Copilot, etc.

Backstop Solutions Inc

March 2023 – July 2024

Software Engineer

Remote

- Upgrade angular from v5 to v17 (in multiple phases).
- Refactor codebase to align with angular best practices and therefore more maintainable/debuggable.
- Advocate for and talk about front end best practices, including angular style guide and need for testing.
- Created low fidelity design using Miro, conducted internal UX testing, and then built the feature.
- Git, Gitlab, Angular, TypeScript, Bootstrap, and related libraries.

Stacklet

May 2021 – Nov 2022

Software Engineer II

Remote

- Build the front-end bits of Stacklet’s user facing web app in React.
 - Reusable component library using story book for React.
 - Dashboards, Admin Panels, RBAC for admin panels, notification settings, etc
- Maintain a >90% unit test coverage using react testing library.
- React, Relay, react-testing-library, GraphQL, Git, related libraries.

Pampered Chef

July 2017 – May 2021

Senior Software Engineer

Addison, IL

- Architect and lead the development of Consultant Product Catalog, an offline capable React PWA.
- Mentor engineers with different seniority on all things front end/Angular.

- Technical lead/point of contact for nearshore engineers.
- Drive the development and adoption of consultant's corner - an angular SPA that uses modular build and route based lazy loading.
- Develop various server-side node/express apps to support client-side applications.
- AWS, Git, Angular (8), React/Redux, service-workers, node/express, typescript, Jasmine, Jest, Protractor, Cucumber, and related libraries.

RR Donnelly

Senior UI Developer

August 2015 – July 2017

Warrenville, IL

- Responsible for building and maintaining the RRD Care application using AngularJS, D3, Karma, Mocha, etc.
- Increased unit test code coverage from <50% to ~85%
- Added and maintained automated e2e tests based on manual testing scripts provided by the QA team members.

Follett Software

UI Developer

January 2014 – May 2015

McHenry, IL

EDUCATION

Georgia Tech

MS, Computer Science

December 2019

- Graduated with 4.0/4.0 GPA., Graduate TA for CS-6400: Database Systems Concepts and Design.

CERTIFICATIONS & SKILLS

- **Certifications:** Apollo Certified Graph Developer – Associate, Building with the Claude API (Anthropic), Claude Code in Action (Anthropic), Introduction to Agent Skills (Anthropic), Introduction to Model Context Protocol (Anthropic)
- **Skills:** React ecosystem, Angular, JS/TS, CSS/Sass, Unit/E2E Testing, mentoring, AI powered/assisted development,
